

Jan.1.2026 Copyright 2026 HIROSE ELECTRIC CO., LTD. All Rights Reserved.  
In case of consideration for using Automotive equipment / device which demand high reliability, kindly contact our sales window correspondents.

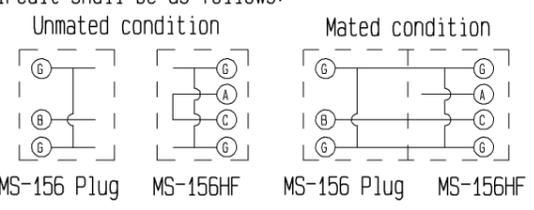

- Note 1 Please do not use the PCB footprint dimensions and the stencil opening dimensions and the plate thickness other than specified, otherwise there is the possibility to have the contact failure by solder and flux wicking to the contact areas.
- 2 When the bottom surface of the product (i.e. the shaded area of the specified footprints dimensions diagram) has been processed with a substrate copper trace and resist processing, Hirose Electric will not be able to warrant the product.
- 3 Do not use hand soldering for mounting of MS-156HF. Doing so could result in solder and flux wicking to the contact areas.
- 4 Exercise caution as not to allow any debris to enter the board mounted MS-156HF when cutting PCB.

~Recommended Mounting of MS-156HF coaxial switch on the PCB during the manufacturing process~

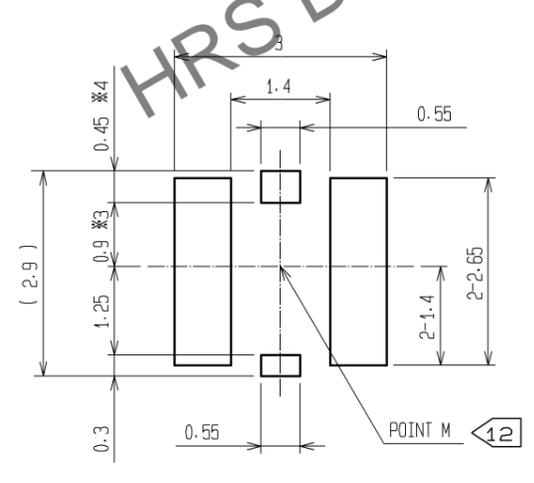

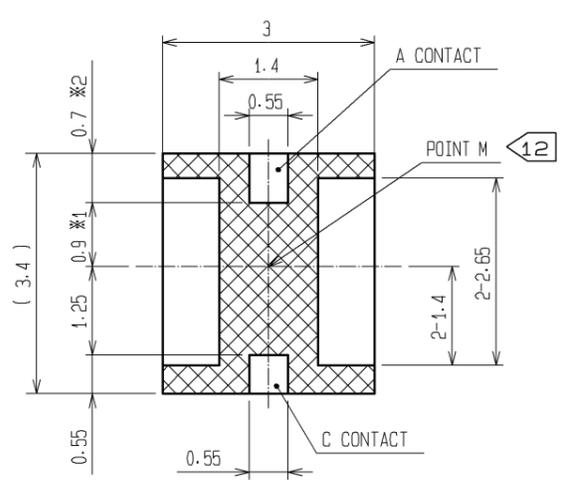

- 5 This product is intended to be used for circuit inspection only. Consult us if any other application is considered.
- 6 Please refrain from using the product in environments specifically affected by excessive vibration, shock, dust, high humidity, gases, very high temperatures and very low temperatures such as outdoor equipment. It might cause degradation or destruction of the product. Even if it endures during a short time, long time qualification is not guaranteed.
- 7 Plugs can be roughly classified to two types.  
- For mass production line automatic check (Press down type)  
- For manual check (With retentive lock) : Unable to be used at production line.
- 8 Do not use the washing process.
- 9 Circuit shall be as follows.

1 SPECIFIED PCB FOOTPRINTS  
13 (TOLERANCE ± 0.05mm)

5 1 SPECIFIED STENCIL OPENING  
13 THICKNESS: 0.1~0.12mm  
(TOLERANCE ± 0.03mm)

2 This area must be free of conductive traces and resist field.

Please comply with the following notes as a request for cooperation to our customers due to the micro precision machinery component.  
(We ask all our customers for their understanding of the following notes and their cooperation.)

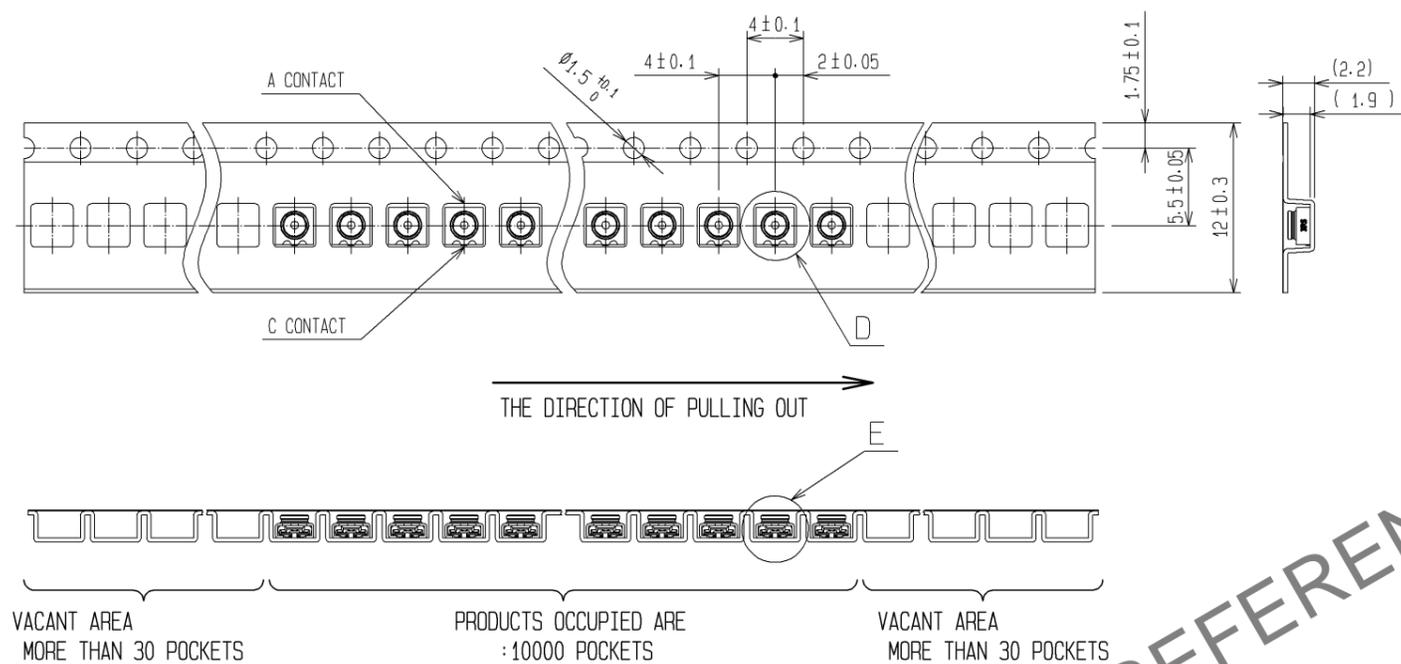

- 10 For use of this product, be sure to put contact area of plug on position P perpendicularly.
- 11 All lead co-planarity shall be 0.1mm MAX.
- 12 Point M indicates the center of the mating portion.
- 13 All lead layout is the same as MS-156NB which is conventional product, therefore the specified mounting condition of MS-156NB which shows dimension correspond to each # number of the following table is also available.

	#1	#2	#3	#4
size	1.05	0.55	1.05	0.3
